Phone photo shot list

For Dr Ndhlovu or the practice manager. About 20 minutes with a phone, for the Google Business Profile and the website. Prepared by Ads Creation Centre, 26 October 2026.

Before you start: privacy

- No patients in any photo, not even in the background.
- No patient names, files, forms, appointment books or computer screens in view. Turn screens off or face them away.
- Staff only appear if they agree to it.
- No filters, no editing beyond straightening and cropping.

Phone settings

- Clean the lens. Use the normal 1x camera, not the wide angle or portrait mode.
- Hold the phone sideways (landscape) unless the shot says otherwise.
- Switch on the room lights and open the blinds. No flash.
- Take 3 or 4 of each shot, then send the best ones on WhatsApp as a document (not as a photo) so the quality stays full size, or share them in a Google Drive folder.

The shots

1 **The first right inside the main entrance**

Standing where you turn right after the main entrance, looking straight ahead at the practice, so visitors recognise the way.

Landscape, from the entrance doors. No people up close.

Finding us

2 **Office TG6B door and signage**

The office door with the ClinoTrend name and room number readable.

Portrait is fine. Shows Google the name on the door matches the profile.

Finding us

3 **Reception**

The reception desk, tidy and empty, with no screens or papers showing patient details.

Landscape, from the doorway.

Inside the practice

4 **Consulting room**

The empty examination room, bed made, natural light.

Landscape, from the corner of the room to show more space.

Inside the practice

5 **Vision and hearing test equipment**

The eye chart or vision tester and the audiometer or headset, no person in the shot.

Landscape, close enough to see what it is.

On-site tests

6 **ECG machine**

The ECG machine on its trolley or desk, screen off or showing no patient data.

Landscape.

On-site tests

7 **Apron outside Gate 2 (for pilots who fly in)**

The apron and visitor aircraft parking seen from Gate 2. Only if airport rules allow photos there.

Landscape. Avoid aircraft registrations up close.

Fly in

Already done

Dr Ndhlovu's new photo (grey ClinoTrend shirt), the photo at his desk, and the outside photos of the main gate and the main entrance of the airport building are on the website and ready for Google. No new portrait or outside shots are needed.

Questions: Ads Creation Centre. These photos are used on the practice's own Google profile and website only.
